Allowable Subject Matter

The indicated allowability of claims 25,26,30,32-37 and 43 is withdrawn in view of the newly applied 112 1st rejection below.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 25,26,30,32-37 and 43 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The original specification does not provide support for the following claim limitations:

The mask opening being formed from a partially flexible material such that the mask opening substantially maintains its shape as the mask opening portion is inserted into and seated within a patient; wherein the tubular member is sufficiently rigid to prevent crushing or kinking; wherein the grate is flexible enough such that the flexible grate material defining apertures between the grate is displaceable.

Allowable Subject Matter

Claims 21,22,24,27-29 and 38-42 are allowed.

The indicated allowability of claims 25,26,30,32-37 and 43 is withdrawn in view of the newly applied 112 1st rejection.

Response to Arguments

Applicant's arguments with respect to the rejected claims have been considered but are moot in view of the new ground(s) of rejection.

The passages in the specification cited by applicant as supporting the claimed subject matter do not state the noted claim limitations. Since the claimed limitations are not inherent from what is disclosed, the examiner contends that the claiming of such material constitutes new matter.

Interference

An interference cannot be initiated since a prerequisite for interference under 37 CFR 1.606 is that the claims be patentable to the applicant subject to a judgment in the interference.
